OMNISCIENT

EPFL Innovation Park

A CTO for your company.

We analyse how you work, then we develop and install your tools.

Custom software

A tool designed for your team, which brings your information together and automates repetitive tasks.

Local AI

AI on your own computers or servers, to search and summarise your documents.

Sovereign data

We define with you where your data is hosted, who can access it and how it is backed up.

HOW WE WORK

1

On-site meeting

We look at how information flows, what is done by hand and what slows you down.

2

Written diagnosis

We write down the problem to solve, what already works and what costs you time.

3

Choice of tools

We compare what exists on the market and recommend what suits your company.

4

Build and improve

When no tool fits, we develop yours with you and keep improving it as your business changes.

Who it is for

For owners of established small and mid-sized businesses in French-speaking Switzerland who have little time for IT and nobody in-house to settle technical questions.

What stays yours

The code and the data belong to you. You can change provider without losing anything.

What we have already put into service

- Online bookings and payments for leisure, sport and events
- Online appointment booking for a nutrition practice and beauty salons
- Online shops for retailers and brands
- Customer records, quotes, invoicing and scheduling: these are the tools we use ourselves every day

Let’s talk about how you work.

A first 30-minute conversation, with no commitment.
